### MEMBERSHIP ELIGIBILITY REQUIREMENTS

**ACTIVE MEMBERS** — To be eligible for election to Active Membership, an applicant must be actively engaged in practicing or teaching geophysics or a related scientific field. The applicant's work must have been of a professional nature for not less than eight years and must have been of a responsible nature calling for exercise of independent judgment and the application of geophysical or geologic principles during at least three of the total eight years' professional experience.

An applicant having worked toward a degree in a scientific field from a recognized college or university may count time as a student toward a portion of the required eight years' professional experience, not to exceed the following: bachelor's degree, four years; master's degree, five years; doctorate, seven years. Time spent solely as a full-time student, even in pursuit of a doctorate, cannot be counted toward the requirement of at least three years' professional experience of a responsible nature.

TRANSFER from Associate to Active Membership is handled in the same manner as election to Active Membership.

### Note to the Applicant for Active Membership:

In addition to reference requirements listed on page 2 of this application, the name of each applicant must be published in the next regular issue of the Society's journal for approval by the membership at large. If no objection is received within 30 days after publication, the applicant shall be deemed approved for membership subject to approval by the Executive Committee at their next scheduled meeting. This process ordinarily takes two to four months.

New applicants will begin receiving *GEOPHYSICS* and *THE LEADING EDGE* upon processing of this application.
