

2009 Distinguished Instructor Short Course
Distinguished Instructor Series, No. 12

sponsored by the
Society of Exploration Geophysicists
European Association of Geoscientists & Engineers

Petroleum Geoengineering:
Integration of Static and
Dynamic Models

presented by
Patrick Corbett

Society of Exploration Geophysicists
The international society of applied geophysics

EAGE

**EUROPEAN
ASSOCIATION OF
GEOSCIENTISTS &
ENGINEERS**

Table of Contents

Inspiration	iii
Dedication	v
Acknowledgments	ix
Chapter 1 Author's Perspective and Geoengineering Context	1
Chapter 2 Background to Geoengineering	7
Chapter 3 Definition of <i>Geoengineering</i>	9
Chapter 4 The Geoengineering Challenge	13
Porosity	13
Permeability	14
Porosity and permeability relationship	15
Lorenz plot and modified Lorenz plot	15
Capillary pressure	16
Petrotyping	17
Wettability	19
Relative permeability	20
Acoustic properties	20
Well testing	21
Importance of scale in geologic systems	22
Summarizing the challenge	22
Chapter 5 Core Skills of a Petroleum Geoengineer	25
Architecture	25
Properties	27
Modeling	35
Simulation	38
Management	39
Summary	40

Chapter 6 Examples of Petroleum Geoengineering	43
Pore scale	43
Laminaset scale	43
Bedset scale	46
Geobody scale	46
Flow-unit scale	49
Reservoir scale	56
Summary	56
Chapter 7 The Future for Petroleum Geoengineering	61
Chapter 8 World Oil Reserves and the Potential Prize for Global Petroleum Geoengineering	63
Chapter 9 Conclusions	69
Appendix A Exercise 1: An Upscaling Example	73
Appendix B Exercise 2: Reservoir Management	79
Well A: A fluvial reservoir	79
Well B: A turbidite reservoir	81
Well C: A shallow-marine reservoir	82
Summary	83
References	85
Index	91
