CO₂ EOR and
sequestration

BOSTON, USA
18-22 JULY 2010

Call for Participation—Application

2010 Development and Production Forum
Boston, Massachusetts • 18-22 July 2010

CO₂ EOR and Sequestration

Application Deadline: 31 March 2010

Society of Exploration Geophysicists
The international society of applied geophysics

In 2010 we turn the attention of the D&P Forum Series to underexplored technical issues that can seriously impact containment and accountability of large volumes of CO₂. The 5-day meeting in Boston will occur in an informal discussion-filled setting where presentations are short, and participants can probe issues and explore ideas.

Topics included in the program are:

- Economic value/risks associated with combining CO₂ EOR with sequestration
- Rock physics, fluid saturations, geochemistry, and geomechanical properties – Integration of data, scaling issues, and simulation studies
- Engineering aspects of injecting megatonnes of CO₂ in heterogeneous reservoirs
- Potential geophysical, geomechanical, and engineering technologies or tools for imaging and assessing dynamic changes in reservoirs, faults, and seal properties
- Technology gaps and promising engineering/geophysical technologies for quantitative reservoir management, monitoring, leakage detection, and mitigation
- Pushing the limit on data acquisition, imaging, and reservoir management in areas of dense population/infrastructure
- Case studies demonstrating use of technologies and challenges

Abstracts: There are no formal proceedings from the Forum. In an effort to encourage candor, presentations are made in an “off-the-record” spirit. However, participants are encouraged to distribute expanded abstracts of their own presentations.

Meeting Format: The meeting will comprise a mixture of poster and oral presentations. Posters will be displayed all week to allow opportunity for focused discussion among small groups. As in previous years, the poster sessions start with a short introduction using no more than two slides. Delegates will have the opportunity to attend all posters during formal sessions. Oral presentations will complement the poster sessions and will include keynote speakers. Experience of previous D&P Forums is that discussion sessions are lively and wide-ranging: the proportion of delegates that actively participate is always high.

Schedule:

- Sunday, 18 July — Registration and Ice Breaker
- Tuesday, 20 July–Thursday, 22 July — Technical Sessions
- Wednesday, 23 July — Group Dinner

Due Dates: Applications can be mailed, emailed, or faxed to Canaan Rice by Tuesday, 31 March 2010, 5 pm CST. A copy of the application can be found on the SEG Web site at <http://seg.org/meetings/dpforum>.

Acceptance: Direct participation of all Forum attendees is mandatory. Participation may be through poster, oral presentation or discussion contributions. Neither oral nor poster presentations is a requirement in order to be accepted for registration. If the number of applicants exceeds the capacity of the conference facilities, then preference will be given to presenters.

Note: The mechanical recording of any portion of the 2010 SEG D&P Forum in any form (photographic, electronic, etc.) is strictly prohibited. Printed reference to the Forum presentations or discussions is not permitted without the consent of the parties involved. All participants are requested to omit public reference to the Forum proceedings in any published work or oral presentation. Only registrants are permitted to attend Forum sessions. Each participant agrees to the above regulations when application is accepted, as indicated by his or her signature on this form.
