

# SEG Digital Library

The premier applied-geophysics collection

The SEG Digital Library is the essential resource for students, researchers, and practitioners working in applied geophysics. Subscriptions include journals and meeting abstracts published by SEG and the Environmental and Engineering Geophysical Society (EEGS). The free Digital Cumulative Index, covering five applied-geophysics societies' publications, is also integrated into the Digital Library. The publications are available at a significantly discounted price when an institution purchases a subscription to the SEG Digital Library package. A subscription gives all members of your community fingertip access to historical and cutting-edge geophysical research.

## SEG Research Collection

This collection includes SEG's journals, *GEOPHYSICS* and *THE LEADING EDGE*; the *Encyclopedic Dictionary of Applied Geophysics*, fourth edition; the SEG Technical Program Expanded Abstracts; and Global Meeting Abstracts. A subscription to the SEG Research Collection provides a discount off the component publications subscribed separately.

### GEOPHYSICS

Widely considered the world's premier journal in its field, *GEOPHYSICS* covers the entire spectrum of applied geophysics, including seismology, potential fields, electromagnetic methods, and borehole measurements.

### THE LEADING EDGE

*TLE* covers all aspects of applied geophysics in a style appealing to a broad readership. Each issue contains approximately 12 technical articles that minimize mathematical theory and emphasize practical applications.

### SEG Technical Program Expanded Abstracts

Papers, numbering more than 850 in recent years, presented at the SEG Annual Meeting. Most papers are four pages with figures and references. Approximately half in recent years are augmented with presentation files (PowerPoint or PDF, some with video). References are copyedited and linked.

### Encyclopedic Dictionary of Applied Geophysics, fourth edition

Robert E. Sheriff's comprehensive illustrated reference for every geophysicist, geologist, explorationist, engineer, energy advisor, economist, and student in the field.

### Global Meeting Abstracts

Expanded abstracts from applied geophysics meetings worldwide.

## EEGS Research Collection

A subscription to the EEGS Research Collection provides a discount off the price of the component publications subscribed separately.

### Journal of Environmental and Engineering Geophysics

JEEG reaches beyond the traditional geophysicist to a diverse group, including practitioners in civil engineering, geotechnical engineering, hydrogeology, and mining engineering.

### SAGEEP Proceedings

The Symposium on the Application of Geophysics to Engineering and Environmental Problems is recognized as the leading conference focused on the practical application of near-surface geophysics.

## The premier applied-geophysics collection covering:

- Amplitude variation with offset
- Anisotropy
- Borehole geophysics and rock properties
- Electrical and electromagnetic methods
- Engineering and environmental geophysics
- Geophysical interpretation
- Gravity exploration methods
- Ground-penetrating radar
- Magnetic exploration methods
- Passive seismic methods
- Poroelasticity
- Reservoir geophysics
- Seismic attributes and pattern recognition
- Seismic data acquisition
- Seismic migration
- Seismic modeling and wave propagation
- Seismic velocity/statics
- Signal processing
- And more...

## Order

For complete details on the contents and how your institution can subscribe to the SEG Digital Library, visit <http://www.seg.org/publications/subscriptions>.

**Society of Exploration Geophysicists**  
The international society of applied geophysics

## The SEG Digital Library

The SEG Digital Library is hosted on the robust Scitation platform operated by the American Institute of Physics. Some of the powerful features that Scitation brings to SEG and EEGS publications include:

- Content alerts (e-mail)
- RSS feed
- Abstract-level searching and browsing without subscription
- Cross-publication searches
- Reference linking and links to citing articles
- Links to and from a variety of abstracting and indexing services (e.g. CrossRef, ISI Web of Science, SPIN, Inspec, GeoRef, Medline, Chempport)
- Article tools (links from abstract pages to a variety of external bibliographic citation-sharing and blogging sites)
- Ability to create and share virtual article collections
- Ability to download citations in a variety of formats
- Digital Cumulative Index (free five-publisher search)
- COUNTER compliant statistics and usage reports
- Accelerated articles (GEOPHYSICS)
- Multimedia
- Portico archiving
